

NEW Denver Crime Map

Denver Police Department has a new public crime map! Below is an outline to help navigate this new feature.

This new map has the same data source as the previous crime map—the Open Data Catalog crime data available [here](#). It includes criminal offenses in the City and County of Denver for the previous 6 months—if you need more data, please use the overall crime dashboard below or the Open Data Catalog data [here](#). The data is based on the National Incident Based Reporting System (NIBRS) which includes all victims of person crimes and all crimes within an incident. The data is dynamic, which allows for additions, deletions and/or modifications at any time, resulting in more accurate information in the database. Due to continuous data entry, the number of records in subsequent extractions are subject to change. Crime data is updated Monday through Friday.

On the left side of the dashboard are various filters (date range, neighborhood, crime category, police district and council district). Date range allows for predefined ranges (last week, last month and current month-to-date) or a custom date range by clicking on 'Calendar'. For the neighborhood, crime category, police district and council district filters, they are dropdowns that allow multi-select. A 'Reset' button is below each filter should you want to reset. Please keep in mind that filters affect each other—i.e. selecting Hampden neighborhood and Police District 4 will result in no data as Hampden is in Police District 3.

As filters are applied, the visuals (map, crime category table, offense list and neighborhood chart) will adjust.

Map Visual: Map of crime based on filters applied. Can search map, view map legend, and change the basemap (map color scheme) using buttons at top right of map.

Crime Category Table: Shows NIBRS crime counts by crime category based on filters applied. Can download data using the download button at bottom left of table.

Offense List: Shows detailed information of all offenses appearing in the map, sorted by offense date. This information comes from the Open Data Catalog data found [here](#).

Neighborhood Crime Chart: Shows counts of NIBRS crime by neighborhood based on filters applied. Use the scroll bar at top of chart to restrict view to fewer neighborhoods.

Nhbd. Stacked Crime Counts: Shows breakdown of NIBRS crime by crime category within each neighborhood based on filters applied. Can export data using download button mentioned above.

Feedback Survey: Please fill out the survey on this new crime map. All feedback will be reviewed and changes to dashboard will be made as we are able.

Overall features:

You can expand any visual to full screen (including survey) by hovering over top right of visual and clicking 'Expand'

To reset all filters, click the blue undo button

at the bottom right of dashboard.

To download filtered data tables, look for the download button  at the bottom left of crime category table and neighborhood charts.

Denver Police Crime Data (Offenses)

Data goes back 6 months and is based on NIBRS reporting. Click on the DPD badge located to the left to access raw data used in the dashboard. Feedback survey located at bottom right.
